

A blog (a portmanteau of the term "web log") is a type of website or part of a website. Blogs are usually maintained by an individual with regular entries of commentary, descriptions of events, or other material such as graphics or video. Entries are commonly displayed in reverse-chronological order. "Blog" can also be used as a verb, meaning to maintain or add content to a blog.

Many blogs provide commentary or news on a particular subject; others function as more personal online diaries. A typical blog combines text, images, and links to other blogs, Web pages, and other media related to its topic. What is a Blog?

How we can help:

If you are looking at having a blog built into your website, or are looking to have your own hosted blog. Even possible customization for that blog or personal site; then we can help you. We support many different content management systems that would allow blogs. Our [shared hosting](#) services have automated installers to "one click install" a blogging system.

Personal sites and blogs are very similar which is why we group them together. We believe the best way to provide a suitable web experience for all users is to use content management systems when building any web presence. We build all of our custom blog and personal sites with the CMS called WordPress.

We charge a flat rate of \$49 to customize and install any Blog or Personal website, this flat fee also comes with 1 month free of our bronze shared hosting service.
