Welcome to our portfolio, what lies here is a collection of websites we have built for clients. These clients have experienced our face to face program. Wherever you are and no matter how big the project we have a sophisticated system to help you build you establish your web presence that will help your business or organization for years to come.

Some things you should keep in mind:

We come to you - No matter where you are or what country in the world you belong in, we have deep business relationships with people all over the world. We can help you design whatever you need too, even if it's the next eBay.com or MySpace.com

We don't charge an arm and a leg - we know what the price of our hard work is worth to us, and that's just enough to keep the company putting along, we donate most of our funds to open source and projects we have worked with for years.

We build a physical portfolio - for you too keep, the physical portfolio has all of the information related to our web design projects and how it specifically relates to your business. Primarily this can be used if you wanted to take out a business loan for new incoming eCommerce customers and something of that nature.

We just get eCommerce - our staff knows how to build website to sell products, our staff knows how to build websites to work in all browsers, our staff knows how to program tons of programming languages on the spot, no need for expensive modules or wasted time we can just do it and get it over with to save you time and money.

Trained in many [1] CMS (Content Management Systems) - the staff at Zio understands how to manipulate almost hundreds of content management systems and effectivley program for them all.

We dominate the competition in price and in effort no matter what it is you are seeking to build, we will do it better and for less. Some of our customers report hundreds of changes before it's perfect. It's your reality, it should be how you dream it. We will work with you until your dreams come true and your web presence is exactly how you visioned it.

Optimization to blow your website up with traffic - so many people waste thousands of dollars a year on search engine marketing and other areas that if done correctly could have better results with no money at all.   **[2]**
Search Engine Optimization
 is an art and if done correctly can literally just blow your website up with traffic.

We keep upgrading your website - even months after we have finished your project we frequently check and maintain it's healthy status for you. The staff keeps an eye on security holes and pre-existing problems that may exist in your web solution.

[1] Content Management System (CMS) is a software system used for content management. Content management systems are deployed primarily for interactive use by a potentially large number of contributors.

[2] Search engine optimization (SEO) is the process of improving the volume and quality of traffic to a web site from search engines via "natural" ("organic" or "algorithmic") search results. Usually, the earlier a site is presented in the search results, or the higher it "ranks", the more searchers will visit that site. SEO can also target different kinds of search, including image search, local search, and industry-specific vertical search engines.
