

Purposing web design is a complex, but essential ongoing activity. Before creating and uploading a website, it is important to take the time to plan exactly what is needed in the website. Thoroughly considering the audience or target market, as well as defining the purpose and deciding what content will be developed, are extremely important.

Industry Web Design

What do we mean by Industry Web Design? Quite simply, design by industry.

We have quite a bit of experience when it comes to specific industries.

We can help you build a platform to stand your business on that can be upgraded, downgraded, or modified.

Vertical Market Web Design

The best part about design services for any vertical market is that there is thousands of applications.

Factoring in the security programming that Zio Inc. can provide, bundled with our uncanny ability to build.

We can easily take any vertical market business idea and turn it into a cash cow for your business.

Because of the market share of modern browsers (depending on your target market), the compatibility.

Another restriction on webpage design is the use of different image file formats. The majority of users.

Many website incompatibilities go unnoticed by the designer and unreported by the users. The only way to avoid this is by testing the website on multiple browsers and devices. Some common examples of vertical markets:

- * Automotive
- * Banking
- * Consumer
- * Education
- * Energy
- * Fast-Moving Consumer Goods (FMCG)
- * Financial (Finance)
- * Food and beverage
- * Government
- * Healthcare
- * Insurance
- * Manufacturing

- * Media
- * Online
- * Real estate
- * Religion
- * Retail
- * Technology
- * Telecommunications
- * Transportation (Travel)
